It was a beautiful Friday morning on the 8th of November 18, 2013. A number of 65 Students from Year 3 to 9, accompanied by 12 teaching staff set off on Tenby International School Setia Eco Garden’s first major school field trip to a mangrove, Tanjung Piai. Students learnt about the plants and animals living in the mangrove, while expanding their knowledge of Science and Geography. Aside from that, they also got to pick up some Bahasa Malaysia and Mandarin by listing the man made and natural elements seen there. Everyone was co-operative and had their fair share of fun.
Swimming Gala
