

## ISP Mission

We are on a journey to deliver a **transformative education to our families and students** that will spark their curiosity and grow their self-confidence, knowledge and life skills that will help them thrive now and throughout their lifetime.

## ISP Purpose

**We exist to grow the world's most curious, confident minds.**

Creating learning experiences that build confidence first and foremost is the most powerful thing we can do for students.

The more confidence you have, the more you engage your curiosity to explore the world around you and take action to learn and grow.

## ISP Principles

Our principles emphasise and underpin how we do what we do.

1

### We begin with our children and students

Everyone at the ISP, whatever their role, is expected to put the success of our students at the heart of everything they do

2

### We pride ourselves on putting learners and their learning first

We think this is the most powerful thing we can do for our students. This is what makes us unique and what we call the Learning.

3

### We treat everyone with care and respect

We look after one another, embrace similarities and differences and promote the well-being of each other.

4

### We learn continuously. Getting better is what drives us.

This ethos is not only a sentiment, but how we operate in our schools through the Learning Improvement Process
